

XC (Compressor Rack Controller)

- The series are designed for compressor rack up to 15 compressors/fans
- Compressor types: multi-stages, differing power, semi-hermetic, scroll and screw new
- Proportional band or neutral zone control.
- Load activation: in set sequence or with automatic rotation.
- Type of probes (NTC / PTC / 4÷20mA) selectable by parameter
- Low and high safety pressure-switch inputs
- Digital input for liquid level alarm.
- Type of gas setting: to control temperature or pressure
- Hours run meter with maintenance warning for each stage.
- Standard communication protocol ModBUS-RTU
- Hot key or Prog tool kit connector for a quick and easy programming.
